

ACE Network Subject Information Guide

MATH7907 Advanced Methods in Mathematics 1

Semester **1** 2025

Administration and contact details

Host department	School of Mathematical and Physical Sciences
Host institution	Macquarie
Name of lecturer	Paul Bryan
Phone number	
Email address	paul.bryan@mq.edu.au
Homepage	https://pabryan.github.io
Name of honours coordinator	Ji Li
Phone number	
Email address	ji.li@mq.edu.au
Name of masters coordinator	Ji Li
Phone number	
Email address	ji.li@mq.edu.au

Subject details

Handbook entry URL	
Subject homepage URL	https://pabryan.github.io/dg
Honours student hand-out URL	
Teaching period (start and end date):	3rd March – 30 May
Exam period (start and end date):	N/A
Contact hours per week:	3 (2 x 1.5 hour lectures)
ACE enrolment closure date:	
Lecture day(s) and time(s):	We will arrange this to suit participants timetable
Description of electronic access arrangements for students (for example, LMS)	Course webpage

Subject content

1. Subject content description

We will start with the classical theory of curves and surfaces, but presented in a modern way that leads naturally and directly to the general theory of manifolds and Riemannian geometry. We will develop the formalism of manifolds, differential forms, vector bundles, Riemannian metrics and curvature, then apply these to global topics relating topology and curvature such as the Gauss-Bonnet theorem, classification of constant sectional curvature manifolds, and time permitting some theorems in comparison geometry such as the Bonnet-Myers theorem.

2. Week-by-week topic overview

Week 01: Multivariable Calculus Review

Week 02: Euclidean Submanifolds

Week 03: Euclidean Submanifolds

Week 04: Geometry of Submanifolds

Week 05: Geometry of Submanifolds

Week 06: Curvature of Submanifolds

Week 07: Curvature of Submanifolds

Week 08: Manifolds

Week 09: Vector Bundles

Week 10: Riemannian metrics and connections

Week 11: Metric space structure

Week 12: Intrinsic and Extrinsic curvature

Week 13: Global Topics

3. Assumed prerequisite knowledge and capabilities

The prerequisites for the course are linear algebra and multi-variable/vector calculus. Familiarity with topology and analysis, particularly differential equations will also be beneficial but is not strictly necessary.

4. Learning outcomes and objectives

Learning Outcome Descriptors at AQF Level 8

Knowledge

K1: coherent and advanced knowledge of the underlying principles and concepts in one or more disciplines

K2: knowledge of research principles and methods

Skills

S1: cognitive skills to review, analyse, consolidate and synthesise knowledge to identify and provide solutions to complex problem with intellectual independence

S2: cognitive and technical skills to demonstrate a broad understanding of a body of knowledge and theoretical concepts with advanced understanding in some areas

S3: cognitive skills to exercise critical thinking and judgement in developing new understanding

S4: technical skills to design and use in a research project

S5: communication skills to present clear and coherent exposition of knowledge and ideas to a variety of audiences

Application of Knowledge and Skills

A1: with initiative and judgement in professional practice and/or scholarship

A2: to adapt knowledge and skills in diverse contexts

A3: with responsibility and accountability for own learning and practice and in collaboration with others within broad parameters

A4: to plan and execute project work and/or a piece of research and scholarship with some independence

5. Learning resources

<http://pabryan.github.io/dg>

6. Assessment

Exam/assignment/classwork breakdown					
Exam		Assignment	100	Class work	
Assignment due dates	Week 4	Week 9	Week 13		
Approximate exam date					N/A

Institution honours program details

Weight of subject in total honours assessment at host department	12.5%
Thesis/subject split at host department	
Honours grade ranges at host department	
H1	85
H2a	75
H2b	65
H3	50

Institution masters program details

Weight of subject in total masters assessment at host department	12.5%
Thesis/subject split at host department	
Masters grade ranges at host department	
H1	85
H2a	75
H2b	65
H3	50
